# DATA VIS - 201006
```

```
## 10 . INTRO TO DATA VISUALIZATION
```

- NikeFuel
- Commits
- Cycling

```
## 15. NEW COMMAND - map()
```

- > Map Basics
- * ****DO**** _u0_
- **mapTimer_lectureSketch**
- ****pde****

```
## 20. NEW COMMAND - two liner loadStrings()
```

- > loadStrings() Example
- **PRE copy***
- <https://jsndyks.github.io/cityBootCamp/data/namesData.txt>
- loadStrings();
- println;
- * ****DO**** _for (top-bot; bot-top; canvas)_

```
## 30. We can do something with this - InteractiveBOOK
```

- > An interactive example
- <https://jsndyks.github.io/cityBootCamp/data/theTimeMachine.txt>
- copy sketch

```
## 40. SPLIT TOKENS Sketch
```

- > 3. Extracting tokens from a line of text
- **namesData_lectureSketch**

```
## 50. BIKES
```

- > 4. Example: Showing Bikeshare data
- TABLE - bikeShare.txt *_show it_ _download it_*
- <https://jsndyks.github.io/cityBootCamp/data/bikeShare.txt>
- **bikes_lectureSketch** -> 100 -> SPINE
- **bikes_lectureSketch** COORDINATES / map -> DYNAMIC

```
## **MENTION** CORE & CODING TASKS - book, temperature and cycling examples
```

```
## 55. ROBOTS
```

- **robotArmy** -> paper!
